

# Sisu – TUNI Moodle: course life cycle

Before course starts

After course has ended

## 1 Create new Course in Sisu

Implementation in Sisu

↓  
Add "TUNI Moodle" classification

↓  
Wait one hour

↓  
New course created

↓  
Responsible persons in Sisu added as teachers in course

## 2 Create content In Moodle

If needed: Copy content from old course to new course

↓  
Create new content

↓  
Publish course to students

Changed 1.10.2020:  
By default, new Moodle course is hidden from students

## 3 Add students from Sisu to Moodle

Confirm enrolments in Sisu implementation

↓  
Wait one hour

↓  
Students added to Moodle course

If "enrolment period with direct confirmation" setting is used in Sisu implementation, students will be added automatically to Moodle course.

## 4 Hide or delete course in Moodle

Hide course from students after the course has ended or later at the appropriate time

↓  
Clean your courses regularly: Move old courses to trashbin (data protection!)

Coming in the future:  
Automation will recommend old courses to be deleted automatically
